Washington, D.C.

RESEARCH INTERESTS

My research centers on the neural, cognitive, and behavioral mechanisms underlying creative reasoning and innovation, in education. My approach is interdisciplinary, drawing on neuroscience, cognitive science, information theory, complex systems, and computational modeling. My current work focuses on developing frameworks for the responsible and effective integration of AI into teaching and learning, so that these tools enhance rather than constrain creativity and learning in classrooms.

EMPLOYMENT

2025–Present. Postdoctoral Researcher, Psychology Department, Georgetown University, Washington, D.C. Lab for Relational Cognition. Supervisor: Dr. Adam Green.

2023–2025. Senior Data Scientist, nonprofit initiative for K–12 schools (MVA, CPA, PCA, SCSA), San Diego, CA.

2015–2022. Teaching Assistant, University of California, Merced.

2012–2015. Instructor of Farsi Literature and Linguistics, Roshan High School, Tehran, Iran.

EDUCATION

2018–2023. Ph.D. in Cognitive and Information Sciences, University of California, Merced. Advisors: Dr. Tyler Marghetis and Dr. Carolyn Dicey Jennings.

2018–2022. M.S. in Cognitive and Information Sciences, University of California, Merced.

2015–2018. M.A. in Interdisciplinary Humanities (Cognitive Anthropology), University of California, Merced.

2010–2014. B.Sc. in Cognitive Archaeology, University of Tehran, Iran.

2008–2012. B.A. in Farsi Literature and Linguistics, University of Tehran, Iran.

SELECTED RESEARCH PRESENTATIONS

- *Information-theoretic early warning signals of mathematical insight*. Department of Cognitive and Information Sciences, University of California, Merced. April, 2023.
- *Seeing the connection: Manipulating access to visual information facilitates creative insight*. Language, Interaction, & Cognition Lab, University of California, Merced. March, 2023.
- *Dynamic attentional mechanisms of creative cognition*. Philosophy Lab. University of California, Merced. February, 2023.
- *Modeling mathematical creativity in its natural habitat*. Department of Cognitive and Information Sciences, University of California, Merced. February, 2022.
- *Creative performance under threat: A Bayesian analysis*. Advanced Statistics for Cognitive Science Course, Dr. Rachel Ryskin, University of California, Merced. November, 2021.
- *Modeling neural correlates of creative cognition via simulated annealing algorithm*. Complex Adaptive Systems Course, Dr. Michael Spivey, University of California, Merced. April, 2020.
- *A re-examination of the interrelationships between attention, eye behavior, and creative thought*. Department of Cognitive and Information Sciences, University of California, Merced. May, 2019.

ORGANIZED WORKSHOPS

- **Learning in the age of AI**. Organized a professional development workshop for school admins across three K–12 schools in San Diego. The session covered effective learning strategies, the role of AI in supporting learning, and hands-on activities to develop skills in prompt crafting, evaluation of AI outputs, and identifying appropriate educational use cases. (Mission Vista Academy, Cabrillo Point Academy, Pacific Coast Academy; San Diego, CA, January, 2025)
- **Intro to Data Science with R and Python**. Conducted a workshop to help Master’s students in Cognitive Science with data analysis and visualization in R and Python. Included hands-on training in data manipulation, statistical analysis, and creating visualizations to effectively communicate research findings (Spring 2023).
- **Designing online behavioral experiments in Qualtrics**. Trained undergraduate research assistants to create and conduct online studies, focusing on experiment design and data collection. I led students in developing a hypothesis about how joint attention (for example, being able to see the instructor’s cursor) could enhance the quality of online Python coding tutorials. I guided them through stimulus design, experiment implementation in Qualtrics, and later data analysis. (Marghetis Lab, Fall 2023).
- **Coding Gestures in Naturalistic Videos and Calculating Inter-Rater Reliability**. Led a workshop for undergraduate research assistants focused on coding gestures, resolving rater disagreements, and statistical methods for reliability assessment (Marghetis Lab, Spring 2022).

- **Using eye-tracking technology to capture cognitive processes.** Trained undergraduate research assistants on the utilization of eye-tracking devices in experimental research. The workshop focused on equipment setup, experimental design, data collection and analysis (Holbrook Lab, 2019).
- **Time series data analysis in R.** Led a specialized workshop for PhD students on time series data analysis, covering key concepts, methodologies, and advanced techniques for analyzing time-dependent data to uncover trends (Spring 2021).

SELECTED POSTERS

- **Tabatabaeian, S.,** Liu, Y., Johnson, D., Patterson, J.D., & Green, A. (September, 2026). Providing real-time semantic feedback can mitigate Creative Homogenization in Human-AI collaborations. *International Mind, Brain and Education Society (IMBES)*, San Diego, US.
- **Tabatabaeian, S.,** Moon, K., Johnson, D., Kay, M., & Green, A. (June, 2026). AI Narcissism: The Persistence of Self-Preference Bias in LLM Evaluations of Creativity. *Society for the Neuroscience of Creativity*, Philadelphia, US.
- **Tabatabaeian, S.,** Liu, Y., Johnson, D., Patterson, J.D., & Green, A. (June, 2026). Mitigating Creative Homogenization in Human-AI Collaboration Through Real-Time Semantic Feedback. *Society for the Neuroscience of Creativity*, Philadelphia, US.
- **Tabatabaeian, S.,** Deluna O’bi, A., Landy, D., & Marghetis, T. (July, 2023). What does the body do, when the body is doing mathematics? *45th Annual Meeting of The Cognitive Science Society*, Sydney, Australia.
- **Tabatabaeian, S.,** & Marghetis, T. (July, 2023). Seeing the connection: Manipulating access to visual information facilitates creative insight. *45th Annual Meeting of The Cognitive Science Society*, Sydney, Australia.
- **Tabatabaeian, S.** (April, 2018). Potential Links between Eye-movement Trajectories and Creative Thought. *10th Annual California Cognitive Science Conference (CCSC)*, University of California, Berkeley.

EDITORIAL AND PEER-REVIEW EXPERIENCE

- Served as a Learning Expert for ImpactBench, contributing expert evaluations to an open benchmark measuring AI’s effects on users across cognitive, psychological, physical, and societal outcomes (2026).
- Journal reviewer for Cognitive Science (2024).

- Collaborated in editing and proofreading the following academic publication: Jennings, C. D. (2020). *The Attending Mind*. Cambridge: Cambridge University Press.
- Journal reviewer for Developmental Science (2019).

TEACHING AND TUTORING EXPERIENCE

- **Intro to Data Science with Python**, Instructor, University of California, Merced (Spring 2023).
- **Culture and Cognition**, Dr. Tyler Marghetis, Teaching Assistant, University of California, Merced (Fall 2022).
- **Graduate Student Academic Writing Tutor**, Teaching Assistant, University of California, Merced (Spring 2021).
- **Critical Reasoning**, Dr. Daniel Hicks, Teaching Assistant, University of California, Merced (Fall 2021).
- **Neuroscience of Consciousness**, Dr. Carolyn Dicey Jennings, Teaching Assistant, University of California, Merced (Spring 2020).
- **Contemporary Moral Issues in Philosophy**, Dr. David Jennings, Teaching Assistant, University of California, Merced (Spring 2019).
- **Introduction to Philosophy**, Dr. Rolf Johansson, University of California, Merced (Fall 2019).
- **Introduction to Cognitive Science**, Dr. Michael Spivey (Fall 2018 and Fall 2015), Dr. Paul Smaldino (Spring 2018), Teaching Assistant, University of California, Merced.
- **Research Methods in Cognitive Science**, Dr. Rick Dale (Spring 2017), Teaching Assistant, University of California, Merced.
- **History of Anthropological Thought and Practice**, Dr. Annith Hundle, Teaching Assistant, University of California, Merced (Fall 2017).
- **Introduction to Socio-cultural Anthropology**, Dr. Robin Delugan, Teaching Assistant, University of California, Merced (Fall 2016).
- **Farsi Literature and Linguistics**, Instructor, Roshan High school, Tehran, Iran (2012–2015).

GRANTS, AWARDS, AND FELLOWSHIPS

- 2023.** Graduate Dean's Dissertation Fellowship (\$20,000), UC Merced.
- 2023.** Cognitive & Information Science Graduate Student Spotlight Award, UC Merced.
- 2022.** Diversity and Inclusion Awards for the Cognitive Science Society Conference (\$1,000), Cognitive Science Society.
- 2022.** Grace Hopper Celebration Scholarship to attend GHC conference for Women in Tech, AnitaB.org Foundation.
- 2021.** Graduate Student Opportunity Program (\$45,000), UC Merced.
- 2021.** John Templeton Foundation grant (\$30,000), for "A Beginner's Guide to Neural Mechanism," a project that provides online and open-access academic videos on topics of neuroscience and philosophy, in collaboration with Fabrizio Calzavarini, Zina Ward, Nick Byrd, and Rafael Gerraty.
- 2021.** John Templeton Foundation grant (\$8,000), for "No Need to Go It Alone: Ecologically Valid Studies of Group Reasoning," in collaboration with Daina Carafa, Nick Byrd, Austin Baker, and Trey Boone.
- 2019.** Fellowship for the Summer Seminars in Neuroscience and Philosophy (SSNAP) (\$1,000), Duke University.
- 2014.** Graduated with honors as the top student in both Archaeology and Literature and Linguistics, University of Tehran.

2014. Ranked 1st in the nation in the entrance exam of Archaeology graduate programs.

2010–2014. Granted the annual top student scholarship of the Archaeology program at University of Tehran four years in a row.

2008. Winner of the gold medal in the National Olympiad of Literature and Linguistics (ranked 1st among 25,000 participants).

MENTORSHIP

- As part of the Grad-Excel peer mentor program at the University of California, I volunteered to mentor four junior graduate students. I met with my mentees regularly, ensuring they adjusted well to their new environment, providing information about funding opportunities, and assisting them in navigating the challenges they encountered in graduate school.

OUTREACH AND COMMUNITY SUPPORT

- **Data Science for Educational Equity (K–12 Charter School Consortium), San Diego, CA.** Applied computational and machine learning methods to identify at-risk students and support data-informed, personalized learning strategies aimed at reducing achievement gaps.
- **Migrant Education Enrichment in Science and Technology (MESAT), University of California, Merced.** Collaborated in designing and evaluating STEM workshops for K–12 immigrant students; conducted pre/post assessments demonstrating increased scientific understanding and interest in college education.
- **Advocacy for International and Undocumented Students, University of California, Merced.** Developed and disseminated a centralized funding resource identifying internal and external grants accessible to international and undocumented students to support equitable access to research opportunities.
- **Promoting Accessible Neuroscience Education through Free, Online Learning Tools.** Contributed to the development of open-access online videos in neuroscience and philosophy to promote equitable access to foundational educational materials.
- **Society for the Protection of Working and Unhoused Children, Iran.** Volunteered with a nonprofit organization serving working and unhoused children; taught foundational reading and writing skills and helped connect children and their families with educational support services.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

2025. Applied AI Microcredential, Georgetown University. Completed 8-module instructor-reviewed program on applied generative AI. Developed competencies in prompting, research applications, ethical considerations, privacy, fine-tuning, and critical evaluation of AI outputs.

2024. Generative AI Fundamentals, Databricks. Gained foundational knowledge of generative AI concepts, responsible AI use, and applications within Databricks' ecosystem.

2023. Python for Data Science and Machine Learning Bootcamp, Pierian Training. Intensive applied course covering Python, data analysis, visualization, and machine learning techniques using libraries such as NumPy, pandas, scikit-learn, and TensorFlow.

2023. Human Resources Analytics, Coursera. Coursework in workforce data analysis, predictive modeling, and data-driven HR decision-making.

2020. Principles of Pedagogy, University of California, Merced. Completed an intensive pedagogy workshop focused on hands-on lesson planning, assignment design, establishing guidelines for productive discussions, and implementing evidence-based teaching strategies.

TECHNICAL SKILLS

Programming Languages: R (Tidyverse, ggplot, rstan, brms), Python (Pandas, Numpy, PyTorch, scikit-learn, Keras, TensorFlow), MATLAB, SQL.

Statistical Analyses: Bayesian statistics, Stochastic modeling, Mixed-effects and logistic regression, Time series analysis.

Machine Learning and AI Techniques: Deep Learning, Natural Language Processing (NLP), Text Embeddings and Vector Databases, Classification, Decision Trees, Random Forest, Clustering, Principal Component Analysis (PCA), Fine-tuning and evaluation of Large Language Models (LLMs), Prompt engineering, AI bias analysis.

Methods: Experimental design, Survey design, Qualtrics, Analysis of naturalistic data, Computational modeling, Human–AI interaction research design.

Tools: Eye-tracking, Virtual reality, EEG, machine learning and AI frameworks (e.g., Hugging Face, OpenAI API).

Software & Web Development: Software development, web application development, API integration, Git/GitHub.

Languages: English, Farsi, French.
